

## Turtle Racing Rear HD Shock Mount TUR0005

Kit Includes:

1pc Rear HD Mount

2pcs M4x25 SocketHead

2pcs M4x35 FlatHead

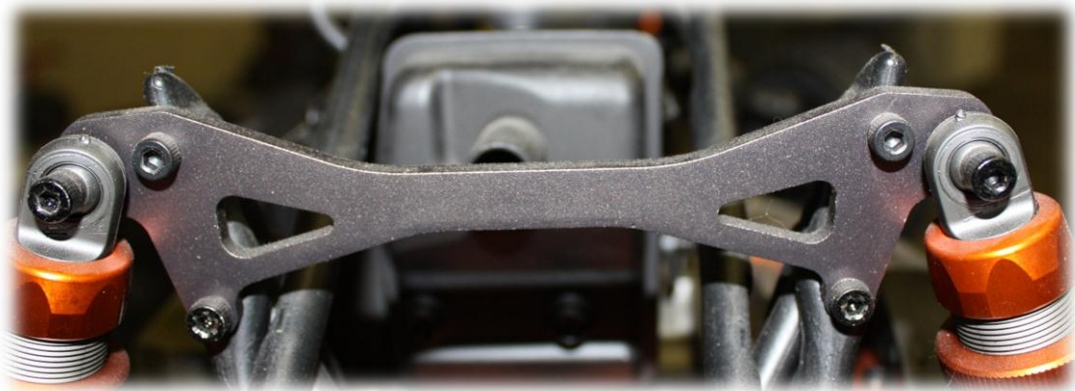

2pcs M4x25 ButtonHead

2pcs M4 LockNut

**Install is the same for all Baja models and the Rear HD fits all Baja models, you will just need to work around the different cages as needed.**

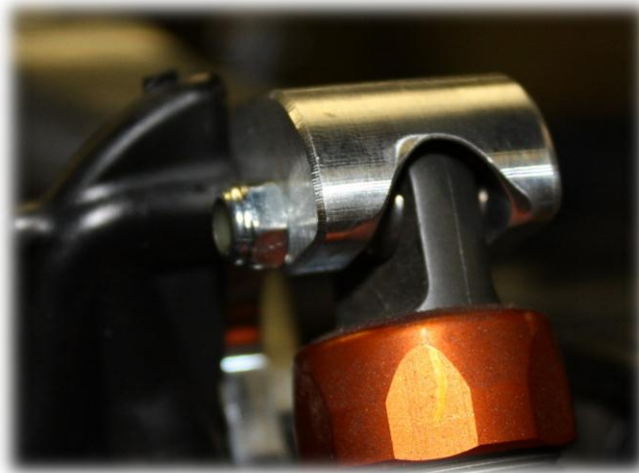

- 1. Remove 4 screws from stock shock mount and 2 screws from shocks. Remove shocks from tower and remove stock shock mount.**

- 2. Install mount using 2pcs-M4x35 flatheads in the lower holes and 2pcs-M4x25 socketheads in the top holes. The top screws are longer than stock and will go through the stock plastic shock towers. You have 2 options- drill through the plastic with 1/8" (3mm) drill or just drive the screws right through.**

3. Install shock into mount and install M4x25 buttonheads, install M4 nut on backside of M4x25 buttonheads

## Install option

Back the 2pcs-M4x25 socketheads in top holes out and use a utility knife or Dremel to cut the plastic, cut a notch to clear a nut and install M4 nut for added strength
