

Turtle Racing Stock replacement 1pc Gear Plate

TUR0011

Kit includes:

TR Gear Plate.

1pc. M4x6 Button Head

2pcs. M5x16 Flat Head

2pcs. M4x25 SHCS

1pc.12x24x6 Bearing (assembled)

The bearings in your kit are Team Fast Eddy Bearings and are available at your favorite dealer.

This product fits All Baja models.

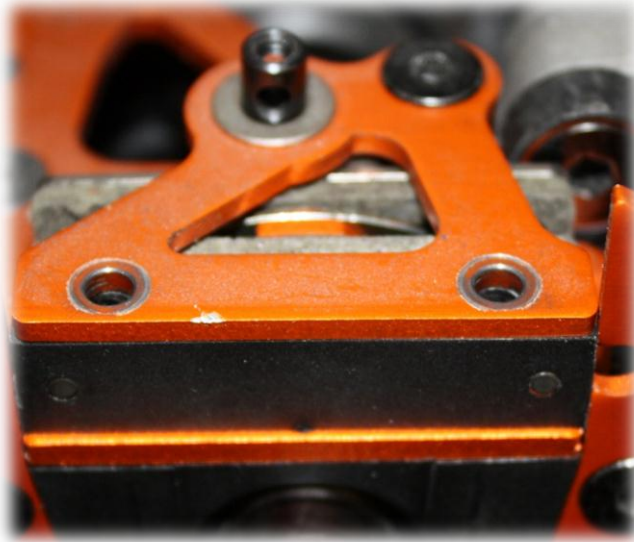

Trucks involve a few more items to remove.

This is for “Stock” type clutch bell carriers only.

DO NOT modify this gear plate to fit any of our HD Clutch systems, this will not only void the warranty of this gear plate it will void the warranty of your HD clutch system components.

1. Remove body/body panels and cage.
2. Remove gear cover, spur gear, “purple” spacer, plastic slot cover (behind spur gear) and 2pcs HPI rubber hole plugs.
3. Remove 2pcs M4 SocketHeads from bell carrier and 1pcs M5 FlatHead from brake assembly, loosen M5 FlatHead on brake assembly but do not remove.

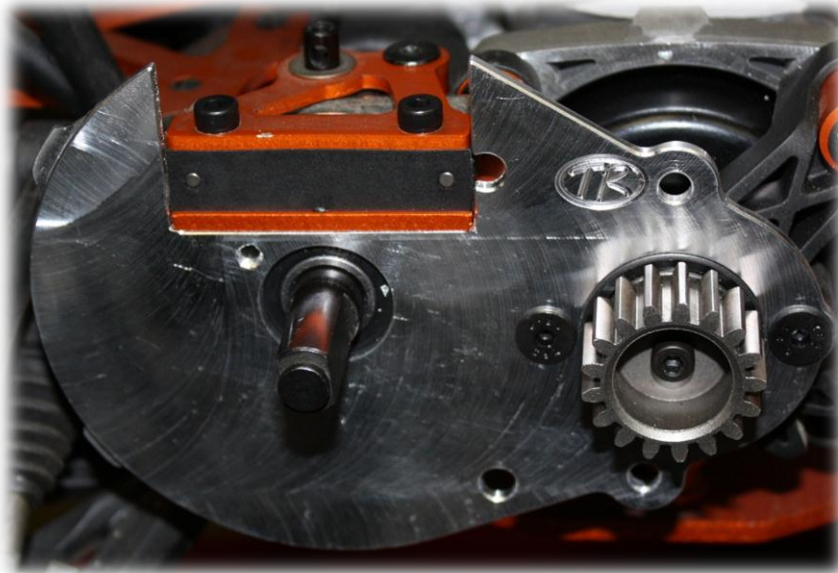

4. Remove gear plate by sliding it right off of carrier and lay shaft.

5. Install M4x6 ButtonHead into TR GearPlate to secure bearing.

6. Slide TR GearPlate onto lay shaft then clutch bell carrier and install 2pcs M5x16 FlatHeads. You may need to tighten FlatHeads to draw plate flush against carrier, if so loosen them a little afterwards.

7. Install 2pcs. M4x25 SocketHeads into brake assembly, now tighten all screws. Don't forget to tighten M5 FlatHead that you loosened in step3.

8. Install HPI rubber Hole plugs in both holes, plastic slot cover, “purple” spacer, spur gear, gear retaining clip, (I recommend using a new clip) and spur gear cover.
